Tree Grate

Manufacturer

Richard Brink GmbH & Co KG
Metal goods manufacture and distribution
Görlitzer Str. 1
33758 Schloß Holte-Stukenbrock
Phone: 0049 (0)5207 9504-0
Fax: 0049 (0)5207 9504-20

Product description

Our high-quality tree grates are protective and design elements in one product. While they ensure that tree roots are protected from external influences and damage, whilst also ensuring that there are no unevenness around the trunk, they also set visual accents. We make this possible with the production of tree grates to match our popular design gratings "Hydra Linearis" made of stainless steel, which catches the eye due to their rod thickness of 7 x 7 mm and meet the highest standards of elegant and timeless outdoor design.

Dimensions

Height	Exterior dimensions	Inner recess
53 mm	1,250 x 1,250 mm	440 x 440 mm
53 mm	1,800 x 1,800 mm	600 x 600 mm

At the customer's request, we can also manufacture the tree grates according to individual dimensions at any time.

Material

Stainless steel (V2A)

Processing and care instructions

In principle, caution is advised when processing the products.

Dust particles of other metals or cutting of components with flying sparks on the product should generally be avoided, as they are very sensitive. If dust particles or dirt from other metals are present, they must be removed immediately with appropriate cleaning agents.

Cleaning must not be done with strong acids or bases, but by hand with a broom or, if necessary, with a high-pressure cleaner.

Further installation and usage instructions as well as information on the material can be found at: <https://www.richard-brink.de/en/downloads/overview.html>
